

Energy Priorities

WHICH HOME APPLIANCE IS MOST IMPORTANT TO YOU?

Increase student awareness of their energy priorities.

Have your students make choices about how they use energy by prioritizing the appliances that are most critical to them.

Have them choose two to five essential home appliances. Then ask them to list and rank the appliances in order of importance from most important to least important with reasons.

Share and discuss their choices among the group. In addition, create a consensus list in rank-order.

HAIR DRYER AIR CONDITIONER
