

# What Your Family Can Do Poster

WHAT CAN YOUR FAMILY DO TO SAVE ENERGY?

Help students visualize their families' conservation actions.

Ask students to illustrate conservation efforts they and their families can participate in. The illustration can be a poster, mural, collage, etc.

To create their illustration, generate a list of energy conservation ideas, such as:

- Buy energy-saving products (high-efficiency showerheads, efficient appliances, etc.)
- Weatherize with insulation, caulking and weather stripping
- Cook with smaller appliances
- Control temperatures, either manually or with a set-back thermostat
- Close drapes and windows when the heat is on
- Open drapes on cool but sunny days
- Hang laundry outside to dry
