

What Can You Do Poster

WHAT CAN YOUR FAMILY DO TO SAVE ENERGY?

Help students visualize their own conservation actions.

Ask students to illustrate the conservation efforts they can participate in. The illustration can be a poster, mural, collage, etc.

Begin by generating a list of ideas, such as:

- Turning lights and appliances when not in use
- Closing doors (refrigerator, outside, etc.)
- Inside doors should be opened to promote circulation
- Recycling
- Walking or biking instead of asking for a ride in a car or other vehicle
- Talking to others about conservation
