

Hire a Power Source

HOW WOULD YOU CHOOSE A POWER SOURCE?

Increase student awareness of energy choices.

Hand out the Power Profile sheet. Review the advantages and disadvantages of each power source.

Ask several students to play the role of a power source that is applying for a job as the power provider for your community (or school. Their job is convince the other students they are the best power source for the job.

Have other a group of students "interview" them for the job, asking questions such as:

- Why are you the best power source?
- What are your strengths and weaknesses?

Then ask the interviewing students to go off and make a decision, which they can then explain to the class.

Increase student awareness of energy connections.

Using the power profile sheet again as a starting point... ask the students:

In what way are all of these power sources some form of solar power?

Are there any that are not?
